Shop CAM092 MANGOUSTE 125 from STIPL Roofz—enhances ventilation for flat and mixed roof tiles.

Mangouste Ventilation System – CAM092

CAM092 MANGOUSTE 125 enhances roof ventilation for flat and mixed tiles.

The **MANGOUSTE 125 – CAM092** is a ventilation system designed to enhance airflow under flat and mixed roof tiles. Crafted by STIPL Roofz, its 125 mm diameter polymer construction prevents condensation and ensures roof longevity. Easy to install, it is ideal for modern and traditional roofing systems. [Ref: Tile Ridge Vent](#)

Dimensions: 125 mm diameter

Material: Polymer

Pallet Quantity (approx): 500 units

Ventilation Component

Mangouste 125 enhances roof airflow efficiency.

Weather Resistant

Resists harsh weather for lasting durability.

Secure Fit

Designed for reliable ventilation installation.
