

TIPK Slate

Improve facade performance with TIPK Slate ventilated tiles from La Escandella. Sustainable design meets sleek, modern slate style.

TIPK Slate: Stylish & Sustainable Facade Tile

TIPK Slate offers a refined slate texture in a ventilated facade design—ideal for eco-conscious and aesthetic constructions.

TIPK Slate brings together La Escandella's trusted ceramic strength and innovative ventilated facade engineering. As part of the VerticalRoof system, this tile creates a moisture-free, temperature-regulating layer that enhances the energy performance of any structure. Its distinct deep slate shade adds architectural elegance while ensuring long-term performance and sustainability. TIPK is ideal for projects seeking a minimalistic yet impactful visual identity with green building benefits.

Verticalroof system

Wind resistance

Load resistance of battens

Impact resistance

Q ? 4,000 Pa

Conforms

Category IV
